## N.Y.C. INDUSTRY COMPANY LIMITED | エヌワイシー工業株式会社

was started in 1981 producing heat resistance plastic as called Thermosetting modifing. Since then, business growth and organisor to entire production and service. Starting from mod design, produced business growth and design, sheen tead is forming and machining processes, palstic paint carting in Its Acid in different mod design, sheet need a forming and machining processes, palstic paint carting in Its Acid silk screen printing, and tempo. Also, automobile parts assembly and electronic appliance in finished products under the "Electrowich" trademark abole to reach customers need and requirement.

### Injection Mold & Press Dies 射出成形金型 (インジェクション& プレスダイ)

Areas and material color and working properties for making interest on the grant process by using the Color Computer Humans control material. The meat process is to use COM (Computer Humans common material. The meat process is to use COM (Cocardo Discharge Material process) and the control of the control

# WELCOME TO NYC

N.Y.C. Industry Company Limited is a leading manufacturer of injection molded plastics including precision injection molded products, parts and components which are fabricated in different plastics,thermoset resins, engineered resins and commodity resins with custom specific blended color concentrates, additives, UV stabilizers and flame retardants.

NYC is family operation that was established in 1981, with more than three decades in business, we have provided custom injection molding solutions, mold design and raw material expertise, SHEET metal form, color coated plastic with exceptional service and superior quality that your company can depend on. We take pride in our ability to perform "All" your plastic injection molding needs. And, of course, all of our products and parts are provally made in THAILAND

# **Distiller Model: Di135**

A pure drop of water for the best of your life

Distiller is approved by CE (European Standard)

# Specification

Model : Di 135
Electric Power (Watts) : 650+20
Electric Power (Volts) : 220-230

Volume (Litre) : 3.50

External Dimension

(W x L x H)(Millimeters) : 223 x 321 x 420

Wight (Kilos): 4.80
Cord Length (Meter): 1.50
Product Quality: CE

Water Quality : µon.(TIS) 257

MADE IN THAILAND
